

Waste Policy

ISG is an international construction services company delivering fit out, construction and a range of specialist services.

This Policy supports ISG's Sustainability Policy and sets a framework for our waste strategy. ISG is committed to minimising the environmental impacts with waste produced during our operations. We will do this by:

- Complying with legislation.
- Utilising Site Waste Management Plans.
- Using and promoting the waste hierarchy to prevent waste arising and avoiding waste to landfill.
- Setting targets for diversion of waste from landfill.
- Providing office recycling facilities.
- Segregating as many waste streams as is feasible on site and in offices.
- Training staff and operatives on the importance of good waste strategy.
- Reducing hazardous waste by encouraging the use of alternatives.
- Purchasing recycled products when feasible to encourage recycling and the manufacture of recycled products.
- Purchasing, when feasible, products which can be easily recycled.
- Monitoring and reporting waste produced and diverted from landfill.
- Working with industry and government specialists to improve the construction industry's environmental impact.

To support our waste management strategy we will be open and transparent and commit to reporting our performance. A copy of this Waste Policy will be made available to any interested party.

Overall responsibility for this policy rests with the ISG Board of Directors and the Managing Directors of ISG businesses.

For and behalf of ISG plc

Signed:

David Lawther
ISG Chief Executive
